Stony Point Community Development Program

NEWSLETTER

September 2022

What's this newsletter all about?

CKSPFN and Hatch are excited to kick-off the Stony Point Community Development Program. We are looking forward to this journey with the community to listen and implement your visions. This newsletter will be sent out to provide updates throughout the community planning process.

Community Development Program

The Community Development Program (CDP) will aim to re-establish a thriving and safe community at Stony Point.

In 2019, CKSPFN undertook a Comprehensive Community Plan (CCP) with both Kettle and Stony Point First Nation members. Now that a community is being re-established at Stony Point, creating an updated CCP will strengthen the vision for the future of the community and address the needs of its residents.

Hatch will be undertaking an Infrastructure Feasibility Study to identify infrastructure needs of Stony Point including housing options and other community services.

Surveys & Focus Groups

Surveys are an important tool that will help the project team gather preliminary information from community members regardless of their location so we can create a CCP reflective of the entire CKSPFN community. We will also be releasing dates for upcoming focus groups with the community.

Complete the survey for a chance to be entered in a draw for gift cards!
