

KETTLE AND STONY POINT PUBLIC WORKS DEPARTMENT

The Chippewas of Kettle and Stony Point First Nation Water System users are requested to take extra measures to reduce unnecessary water consumption and high volume water uses from July 19th, 2022 until further notice.

Your cooperation is important and all users are urged, whenever possible, to defer activities which may use large amounts of water like: filling pools, watering lawns, and washing vehicles until the conservation order is lifted. We will announce the end of this water conservation period as soon as possible.

This would be an excellent time to fix that leaky faucet or constantly running toilet which is wasting a valuable resource and is costing you extra money! With good user cooperation and conservative use there should be ample supply of water for normal household use during this period and we hope to avoid any interruption of service.

The CKSPFN Public Works Department appreciates your understanding and cooperation during this time. If you have any questions contact the Public Works Manager James George at **519-786-4552** or **james.george@kettlepoint.org**.
